Risk Management for Derivatives	As part of its on-going efforts to address international bank supervisory issues, the Basel Committee on Banking Supervision has been engaged in several activities to strengthen the prudential supervision of banks' derivatives operations. One of these activities has been a reassessment of the key elements of sound management of the risks involved in derivatives.	Financial services supervisors, managers and staff involved in risk management, particularly those who employ derivatives.	3	10/14/2018
The International Framework for Basel II and III	The banking industry has long been attached to the pillars of Basel Committee of banking control. This committee aims at defining a set of determinants for banking control, which guarantees achieving the safety of the international banking system. There are a lot of international variables, which mandate the application of this committee's tiers as one of the important international standards that supports the banking systems in different countries; especially with regards to globalization. Globalization has rendered the banking industry and its various systems more attached and more effective of each other. For the sake of understanding this, this program has been designed to cover all the requirements of the banking system in order to apply these international pillars.	Program targets those who work in the departments of: risks, credit, treasury, audit, internal control, finance and compliance, in addition to those who work in feasibility studies and project management.	3	10/21/2018
Asset and Liability Management	In this course, participants will learn the basic elements of bank financial statement analysis and the role and impact of asset/liability management in executing bank strategies and enhancing bank profitability. This course will also cover the time value of money, the risk-return trade-off, liquidity risk, and interest rate risk, as well as the regulatory framework with regard to capital adequacy and Basel II.	<ul style="list-style-type: none"> Bank staff in the following departments: credit analysis, marketing, risk management, internal audit and compliance, treasury and back office, financial control, and information technology and management information systems.
